DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/02/2005 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagata et al. (US6060199A).

In regard to claims 1 and 3, Nagata et al. teach (Figs 3A-B) a LCD device comprising:

- a thin film transistor TFT formed on a substrate 5, the TFT having a gate 12, a source 16a/17a/18a and a drain 16b/17b/18b (the transparent conductive layer 17a-b and the metal layer 18a-b can consider as the source and drain of TFT);

Art Unit: 2871

- a color filter layer 8 on the TFT to be in direct contact with at least the source or drain; wherein the contact is ONLY at portion where the color filter is overlapping ONLY edge portions of the source and drain electrodes so as to prevent light leakage (col. 4 lines 39-40) and improve an aperture ratio (col. 4 lines 33-35);
- a pixel electrode 10 formed above the color filter layer to be in electrical contact with the drain;

wherein

Claim 2:

- the color filter layer and at least source or the drain in direct contact such that are no intermediaries therebetween as shown in Figs. 3A-B.

Claim 4:

- no passivation layer formed between TFT and the color filter layer as shown in Figs. 3A-B (claim 4).

Response to Arguments

Applicant's arguments filed on 09/02/2005 have been fully considered but they are not persuasive.

Applicant's ONLY arguments are follows:

Nagata fails to anticipate the amended features: the color filter is overlapping ONLY edge portions of the source and drain electrodes so as to prevent light leakage and improve an aperture ratio;

Examiner's responses to Applicants' ONLY arguments are follows:

Nagata disclose the color filter is overlapping ONLY edge portions of the source and drain electrodes so as to prevent light leakage (col. 4 lines 39-40) and improve an aperture ratio (col. 4 lines 33-35);
